Sir,

Her Majesty's Stationery Office, 31 December 1867.

I HAVE the honour to forward herewith, for the information of the Lords of Her Majesty's Treasury, an Estimate of the sums that will probably be required to defray the expenditure of this Office for the public service during the ensuing financial year 1868-69.

By their Lordships' direction, this Estimate is made out in a much simpler, and practically, I think, clearer and more satisfactory form than that previously in use. The aggregate sum which I believe it will be necessary to provide is considerably larger than that of the preceding year, and I will briefly explain the reason for this augmentation.

In the first place, I have to ask for a specific sum of 16,831*l.* to make good the deficiency in the Estimate I sent in for the year 1866-67. The actual and unavoidable outlay in that year exceeded the Parliamentary grant by that amount, and I was obliged, early in the current year, to apply to their Lordships for a loan out of the Civil Contingencies Fund, which loan has had to be repaid out of the grant for the current year. The causes of this deficiency were manifold. The outlay for Parliamentary printing (always, as their Lordships are aware, a very conjectural and uncertain item) proved to be 10,000*l.* more than I had expected; the demands of several public offices exceeded my calculations; and besides this, after my Estimate had been sent in, I was called upon to provide, as often happens, for the wants of several unexpected Commissions of Inquiry.

Supplementary Estimate.

It is, as I have often had occasion to explain, impossible, in a department like the Stationery Office, which has to provide for the sudden and unforeseen demands of all the Public Offices, to arrive at more than an approximate calculation of the sums that will probably be expended, and it has usually been thought wiser to err on the side of moderation than of excess.

I hope under this head to be able to make a somewhat smaller sum than that voted last year suffice. The last Session of every Parliament is usually less costly than its predecessor; but still I see no reason to believe that less than 72,000*l.* will cover the aggregate cost of Parliamentary printing, especially as an unusually large number of temporary Commissions—twenty-three in all—are now sitting, and the requirements of some of them are very considerable. The Reports and Evidence of the Schools Inquiry Commission are especially voluminous, and the Report of the Boundary Commission, appointed at the close of last Session, will contain 220 coloured and detailed maps of counties and boroughs, 2,000 impressions at least of each of which must be struck off.

Parliamentary Printing.

It has been considered advisable that several Public Departments which have hitherto repaid the Stationery Office for its expenditure on their behalf, shall cease to do so, as the system involves complicated and troublesome accounts, and answers no purpose whatever. This arrangement, of course, while reducing their Estimates, will necessarily swell mine.

Repaying Offices.

The cost of the office itself, besides the gradual increase of salaries which takes place from year to year, as the *employés* rise from the minimum to the maximum remuneration, will in future be increased; first, by the sums paid to various parties for editing certain Stationery Office Publications—such as the Navy List, which has not hitherto come into our accounts, and the Army List, which has hitherto been charged under a different head; and secondly, by a sum between 600*l.* and 700*l.* for carriage, hitherto charged among the tradesmen's accounts, but which will in future go to swell the incidental expenses of this office—expenses which must necessarily and legitimately increase from year to year as more and heavier work comes upon us. The growing magnitude of our transactions may be in some measure estimated by the fact that the gross expenditure controlled by this office, which all represents work actually done, rose from 448,000*l.* in 1865-66 to 566,000*l.* in 1866-67.

Stationery Office Establishment.

A smaller sum than that estimated for last year by about 4,790*l.* will, as far as I can foresee, be required for the Gazettes and the Stationery Office Publications, in consequence of its having been decided to abandon the plan of stamping the Gazettes; while the steady increase in the demands from nearly every Department of the Government, which, as I have more than once pointed out, is unavoidably entailed by the gradual augmentation of the general administrative business of the country—an increase moderate perhaps in each instance, but amounting to a considerable sum in the aggregate—will account for the residue of the addition I am obliged to ask for.

General Expenditure.

In conclusion, I am glad to be able to show, by a similar comparison to the one I appended to my Estimate of last year, that the increased work done, as shown by the

the far larger expenditure controlled, has been effected at a considerably reduced rate per cent.

				Total Expenditure Controlled.	Gross Cost of Establishment.	Rate per Cent.
				£.	£.	
1864-65	-	-	-	444,800	17,800	4*
1865-66	-	-	-	448,200	18,600	4.15
1866-67	-	-	-	566,985	19,904	3.51

				Parliamentary and Government Expenditure Controlled.	Net Cost of Establishment.	Rate per Cent.
				£.	£.	
1864-65	-	-	-	360,500	16,000	4.43
1865-66	-	-	-	352,300	16,350	4.63
1866-67	-	-	-	393,581	16,066	4.08

N.B.—The increase in both the gross and net cost of the establishment is due in part to the gradual advance of salaries from the minimum towards the maximum, and in part to the circumstance of the office of Comptroller having been vacant for some weeks in the first of the three years.

Progress of Expenditure.

It may be interesting on the present occasion,—when a change in the mode of presenting the Estimate has been introduced which will make future comparisons less easy,—to give a glance backwards, and to take a comprehensive survey of the progress of expenditure in the Stationery Office, accompanied by an explanation of the causes of such increase as may have taken place, and a discrimination of the cases in which that increase has been real and actual, from those in which it has been merely apparent and the simple result of altered arrangements of account. With this view I have prepared the following Table (*see below (a)*) of the actual expenditure (exclusive of that for India and the Colonies)

(a)—ACCOUNT of the COST of STATIONERY supplied to the various Departments in *England, Ireland, and Scotland*, in the Years 1852-53 to 1866-67, both inclusive, together with the COST of PARLIAMENTARY PRINTING and the ESTABLISHMENT during the same period.**

* The Crimean War swelled the expenditure of the Stationery Office for some years, on behalf of all the principal Administrative Departments, by an aggregate probably of nearly 80,000 *l.* a year, a very considerable portion of which (in one year 32,000 *l.*) was due to the enormous amount of ammunition paper we were called upon to provide.

† At this time we began to provide the necessary books and supplies for Garrison Schools and Military Libraries, at an outlay varying from 2,000 *l.* to 9,000 *l.* We also paid for the Patent Office, under special order, nearly 50,000 *l.*

‡ In this year the supply of parchment forms for the Unstamped Warehouse Department of the Inland Revenue was assigned to the Stationery Office which has since spent on that account yearly sums varying from 10,000 *l.* to 16,000 *l.* In this year, too, the outlay on account of specifications, &c., for the Patent Office (which used to be defrayed by the patentees, and which we began to provide in 1854-5), reached its maximum, viz., 49,500 *l.*—a sum not greatly reduced.

§ In this year the cost of "Stationery Office Publications" (varying from 10,000 *l.* to 15,000 *l.*), formerly charged for the most part under the head of Parliamentary Printing, was for the first time entered among our general expenditure.

|| The marked reduction in this year was due to the abolition of the paper duty, which was a saving to the Office of about 20,000 *l.*

¶ A considerable increase in the expenditure for the Registrar General's Department, and some branches of the Post Office, took place in this year, as well as a general augmentation in the aggregate demands of the public service.

** The total figures in each year in this table do not tally exactly with the actual expenditure as rendered to the Audit Office, mainly owing to variations in the amount of Stock.

Colonies) ordered and controlled by this office for the last 15 years, dividing it under three heads, viz.: the cost of Stationery, &c., supplied, and work done for the several Government Departments; Parliamentary printing, *i. e.*, printing by order of the two Houses, or by the Government for presentation to them; and the cost of the Stationery Office Establishment itself. It will be seen that though the fluctuation in particular years has been very great, and the work thrown upon the office greatly increased, yet the average expenditure has increased far less than could have been anticipated,—a result which must be mainly attributed to the ceaseless vigilance and the good arrangements of my predecessor. Thus, it averaged—

	£.
1852-56 - - - - -	357,523
1857-61 - - - - -	380,541
1862-66 - - - - -	362,093

To take the last and least important item first. Between the two first and the two last years of the series, it will be observed that the cost of the Stationery Office Establishment has risen from an average of 11,900*l.* to an average of 19,250*l.* This increase is attributable in part to the gradual advance of the salaries of those employed from the *minimum* to the *maximum*, in part to the moderate increase of staff and salaries settled in 1856, when the office was revised, &c., by a Treasury Commission, but chiefly to the great augmentation in the work transacted, and the subsidiary labour consequently employed. In the two first years the *entire* expenditure controlled, including the Colonies and repaying offices (India was not then supplied by this Department), averaged 321,740*l.* In the two last years it averaged (India included) 507,600*l.* The cost of the Stationery Office, as compared with the outlay managed, was therefore 3·7 per cent. 15 years ago, and 3·78 per cent. now. It will be seen, therefore, that though the cost of the Establishment is increasing absolutely, it is not increasing relatively to the work performed.

This item of expenditure varies, it will be seen, more than any other, and is of course less under control than any other. It swells with the fluctuating exigencies of the public service, and with the eventful or stagnant character of the times. It reached its maximum, as might have been expected, during the Crimean war, when it nearly doubled the sum expended in the lowest year of the series, viz., 1865-66. After that period, the unceasing and well-directed efforts and representations of my predecessor, supported by a certain uneasy astonishment on the part of both Government and Parliament at the high figures reached, succeeded in greatly reducing the aggregate outlay. This was effected, partly by reducing the prices paid to the printers, which had at one time been excessive; partly by reducing the number of copies of each document struck off, which used to be very extravagant; and partly by introducing a cheaper and less ostentatious type and style in the Command Papers. A still further and very material saving might, no doubt, be effected in this direction, if the two Houses could be persuaded more completely to follow the example of the Government in this particular.

It may be gathered from the notes appended to the tabular statement, that the causes of the fluctuations, and of the general increase under this head, are threefold:—*first*, temporary augmentations of expenditure arising from specific demands, the more important of which have been briefly mentioned in each year of their occurrence; *secondly*, the transfer to the Stationery Office of the task of providing supplies previously procured by the various Departments for themselves, or supplies for new Departments, temporary or permanent; and *thirdly*, that general increase of outlay which the nearly constant augmentation of the business of the Government and the country renders unavoidable. The first of these causes cannot be helped; the second is, for the most part, apparent only,—nay, is an actual saving to the public in many cases, inasmuch as the Stationery Office can supply the various offices at a much cheaper rate than they could or did supply themselves; while the third, if kept within bounds by proper vigilance, must be accepted as an inevitable condition and accompaniment of administrative activity and extension, and, while a fit matter for watchfulness, is assuredly not a fit matter for *primâ facie* objection. In the year 1861-62, we supplied articles to the extent of 65,000*l.* to Public Offices, for which, in 1851-52, we had no accounts open in any shape. The extent to which the regular demands of the great Public Departments grow from year to year, as well as the degree to which year by year it has been their practice (and a very salutary one) to throw upon the Stationery Office items of expenditure previously provided for in their own Estimates, may be conjectured from the four following tabular statements.

Of these, the two last represent probably increased work done for or accommodation given to the public; the first, in a great measure, a mere transfer of accounts.

EXPLANATIONS OF ESTIMATE.

A.—(The letters refer to the Sub-Heads opposite.)—The increase in the Estimate for extra copying, is occasioned by the preparation of unusually heavy returns in the year 1867–8, part of the payment for which will fall in the year 1868–9.

D.—The increase in the number of Inspectors and Inspectors' Assistants is caused by the anticipated increase in the number of Schools and Children to be visited and examined. Two of the additional seven Inspectors represent temporary appointments only, viz., substitutes for two of the Senior Inspectors withdrawn to serve on the Commission of Inquiry into Education in Ireland.

I.—The numbers, 1,008,431 Day Scholars and 55,440 Evening Scholars, are arrived at as follows:—

	Day Schools.	Evening Schools.
Number of Scholars in average attendance in Schools actually Inspected in the year ending 31st August 1867. This number is the basis of calculating the other figures in these columns - -	911,681	45,835
Add for increase for one year, viz.: 5·6 per cent. for Day Schools, and 14·2 per cent. for Evening Schools - - - - -	51,055	6,508
Estimated average attendance in Schools to be inspected in the year ending 31st August 1868 - - - - -	962,736	52,343
Inspection ordinarily precedes payment by two months; and so the year of inspection, ending 31st January 1869, answers to the year of payment, ending 31st March 1869. In correcting the results of a year ending 31st August 1868, for a year to end 31st January 1869, it is necessary to substitute for five of the months (twelfths) of the former year, five other months (twelfths), wherein 962,736 Day Scholars are increased at the rate of 5·6 per cent. per annum - - - - -	22,464	—
And 52,343 Evening Scholars are increased at the rate of 14·2 per cent. per annum - - - - -	—	3,097
Add for estimated addition to the number of Half-timers for the financial year ending 31st March 1869, by the Workshops Act - -	23,231	—
TOTAL - - - - -	1,008,431	55,440

The rate of grant actually paid per day scholar for the years ending 31st August, was 8s. 1d. in 1863, and 9s. in 1864–5–6–7. The additional 9½d. per scholar in the present Estimate, to allow for 38,770½ to be expended as increased aid under the Minute of 20th February 1867,* is estimated as follows: under Resolution I., 30,000 l.; under Resolution II., 4,303 l.; under Resolution III., 4,000 l.; under Resolution IV., 467 l.: Total, 38,770 l.

* Minute, 20 February 1867 (as follows):—

Resolved,—

I. To provide in the Estimate for Public Education in England and Wales, during the financial year 31st March 1867–8, for an additional grant of 1s. 4d. per pass in reading, writing, or arithmetic, up to a sum not exceeding 8 l. for any one school (department) upon the following conditions beyond those now specified in the Articles 38–63 of the Code, viz.:—

- The number of teachers must have allowed, throughout the past year (Article 17), at least one certificated or one assistant teacher, fulfilling respectively the conditions of Articles 67 and 91–3, for every 80 scholars, or one pupil-teacher fulfilling the conditions of Articles 81–9 for every 40 scholars, after the first 25 of the average number of scholars in attendance.
- The number of passes in reading, writing, and arithmetic must—
 - Exceed 200 per cent. of the annual average number of scholars in attendance who are over six years of age. In schools where the calculation of average attendance is made indiscriminately upon scholars above and scholars under six years of age, the school registers of age are to determine in what ratio the average number in attendance is to be divided.
 - Fall under Standards IV.—VI., to the extent of at least one-fifth part of the whole number of passes.
- The time tables of the school, in use throughout the past year (Article 17), must have provided for one or more specific subjects of secular instruction beyond Article 48. The Inspector must name the specific subject or subjects in his report, and must state that at least one-fifth part of the average number of scholars over six years of age have passed a satisfactory examination therein.

II. To exempt, for one year, from the operation of Article 46, children who have already passed in Standard VI., provided they pass a satisfactory examination in the subjects professed in their school beyond Article 48, conformably to section (c) in paragraph 1. of this Minute.

III. To provide in the same Estimate for certain new grants to elementary schools wherein it should appear from the Inspector's last report that the number of teachers throughout the year (Article 17) had been sufficient to satisfy section (a) in paragraph 1. of this Minute; such grants to be at the rate of 10 l. for every male pupil-teacher admitted (Articles 105–110) from the said elementary schools into any normal school under inspection from candidates placed by examination in the first class, and 5 l. for every male pupil-teacher so admitted from candidates in the second class.

IV. To offer certain further new grants to the same elementary schools for every male pupil-teacher who, having been admitted from them into a normal school under inspection at the examination (Article 103) held in December 1867, or at any later examination, should at the end of his first year's residence, be placed in the first or second division (Articles 119, 121, 1023); such grants to be at the rate of 8 l. for every student placed in the first division, and 5 l. for every student placed in the second division.

No grants of this kind can become payable before December 1868, and therefore, although offered now, they have no place in the Estimate for the financial year, March 1867–8.

V. To pay, in the financial year 31st March 1867–8, only so many twelfth parts of the additional grants offered by this Minute as, in the case of grants under paragraph I., equal the number of months from 1st April to the end of the school year (Article 17), and, in the case of grant under paragraph III., equal the number (nine) of months from 1st April to 31st December (Article 81, f. 2).

8.—PUBLIC EDUCATION, GREAT BRITAIN—*continued.*SUB-HEAD of ESTIMATE I.—*continued.*

RESOLUTION I.*—The examination of 2,770 Departments of Schools under this Minute shows that if every condition were fulfilled by every Department, and if the ratio of passes to scholars in 1866-7 remained permanent,

	£.	s.	d.
The grant per annum for Departments with <i>less</i> than 65 children is - - - - -	5	5	10
The grant per annum for Departments with <i>more</i> than 65 children is - - - - -	7	9	3

The estimated number of Departments (excluding Infants and Evening) to which payments are conditionally due in the year ending 31st March 1869 is,

Of Departments with an average attendance of <i>less</i> than 65 children, 3,760, which at 5 <i>l.</i> 5 <i>s.</i> 10 <i>d.</i> , gives -	£.	19,896
Ditto - - ditto - - - <i>more</i> „ 65 „ 5,690, „ 7 <i>l.</i> 9 <i>s.</i> 3 <i>d.</i> , gives -		42,461
Grant claimable, as above, in year ending 31st March 1869 - - -	£.	62,357

The conditions as to Staff (*a*), and higher subjects (*c*), will probably hereafter be fulfilled in a majority of cases. The failures will principally arise on the ratio of passes to average attendance (*b* 1), and of passes under, to those in and over, Standard IV. (*b* 2). These failures may be roughly estimated at one-half of the Departments examined, or 31,178*l.* 10*s.* Probable expenditure, say, 30,000*l.*

RESOLUTION II.*—Of the children on the books of Aided Elementary Schools, 18 per cent. are 11 years of age and upwards, and 10 per cent. are 12 years of age and upwards. It is fair to assume, therefore, that out of every 18 children at school of 11 years of age and upwards in any one year, 10 will be at school in the next year; or (allowing for children admitted in their 12th year) say 9, *i.e.* one-half. The number of children presented in Standard VI., in the year ending 31st August 1867, was 21,516. If we assume that these are taken indiscriminately from the whole group of children of 11 years of age and upwards, the number for presentation next year will be 10,758; which at 8*s.* = 4,303*l.*

RESOLUTION III.*—It is estimated that 500 Male Pupil Teachers from schools satisfying this Minute will pass the examination for admission into Training Colleges at Christmas 1868, in the proportion of three in the 1st class to two in the 2nd. The amount, therefore, to be provided under this head is $300 \times 10*l.* = 3,000*l.*$, and $200 \times 5*l.* = 1,000*l.*$; together, 4,000*l.*

RESOLUTION IV.*—Of the Male Pupil Teachers, fulfilling Resolution III., who have passed the examination for admission into Training Colleges at Christmas 1867, it is roughly estimated that about 85 will be placed in the two first divisions in which the students are classed (Article 121), in the following proportions:—14 in the first division at 8*l.* = 112*l.*, and 71 in the second division at 5*l.* = 355*l.*; together, 467*l.*

The rate of grant per evening scholar for the years ending 31st August was 5*s.* 9½*d.* in 1865, 5*s.* 8*d.* in 1866, and 6*s.* 3*d.* in 1867. The rate of 6*s.* 6*d.* has been adopted for the year ending 31st March 1869, but these grants have been too short a time in operation to afford exact data for average.

K. (See Sub-Head K., page 12.)—Building and Furnishing of School Premises :

The expenditure for building in the year ending 31st March 1867, was 123,889*l.* 16*s.* 1*d.*, viz., 24,741*l.* 6*s.* 6*d.* from the public grant, and 99,148*l.* 9*s.* 7*d.* subscribed. The result of this expenditure was 80 new schools, and 57 teachers' residences were built, 57 schools were enlarged or improved, and accommodation was provided for 21,286 children.

L. (See Sub-Head L., page 12.)—Annual Grants to Training Colleges:

The Estimate for training colleges is based on a mode of payment noticed in previous Estimates, as follows:—“We have provided for the gradual introduction of a plan, whereby each college will be paid for those only of its students who are fairly launched in their profession as teachers. The principle of our Minute is shortly this:—We assume 100*l.* to represent the cost of training a male, and 70*l.* that of training a female student, during two years; and we grant to the college five annual payments of 20*l.* for each of its male, and 14*l.* for each of its female students who, after probationary service as a teacher, obtains one of our certificates. We limit the total amount of our grant to 75 per cent. of the approved expenditure, and we also make it dependent upon the number of students for the time being in residence.”

* The Census gives the population only in quinquennial divisions.

† The Age Returns of Scholars do not distinguish ages under four years, nor over 14 years. In the comparison of scholars with population, allowance must be made for a few scholars aged less than three years, and more than 14 years; but the number is insignificant.

‡ The examination of children under six years of age is not recorded.

§ The standards are placed under the years (see heads of columns) in which each is meant to be passed. The marginal sub-divisions (under 10 years, over 10 years,) of C, D, and E, show how many children, at the end of the ordinary day-school age, are presented, and fail to pass in each standard.

NOTES.

(C.) The number of Visitors to the Museum during the year 1867 has been, in the morning, 442,877, and in the evening, 203,639, giving a total of 646,516 persons. Since the opening of the Museum, from 22 June 1857 to 31 December 1867, it has been visited by 7,132,988 persons. The annual average, excluding 1862, the year of the Exhibition, has been 624,714.

(C. 2.) The Metropolitan Police Force has the entire charge of watching the Museum, both internally and externally. The Museum and Schools are lighted from sunset till 10 p.m.: and great precautions against fire are necessary. The numbers attending the Museum in the evening, since the opening in 1857, have been 2,654,575.

(C. 4.—1 & 2.) These purchases are supplementary, a large number of the books and objects in the collections being presented to the nation by the public. 2. The collections of Naval Architecture have been lately transferred from Somerset House for the use of the Students of the School of Naval Architecture, and the inspection of the public. Numerous additions have been made by private shipbuilders.

(C. 4.—3. *a. c.*) Objects are circulated, as far as practicable, to local Art schools.

(C. 4.—*d.*) The number of Loans received from private individuals in 1867 was of the value of several hundred thousand pounds. The names of the lenders, &c. are given in the Annual Report.

(C. 4.—4.) The Art Library was attended by 12,822 persons in 1867.

The books, &c. are also circulated to the local Schools of Art under proper regulations. 13 Schools borrowed Books in 1867.

(C. 4.—5.) A printed Catalogue of the printed works of all countries relating to the Fine Arts from the invention of printing up to the year 1865, is in course of preparation.

(C. 4.—6.) Every object in the Museum is labelled.

(C. 6.) The amount proposed to be taken this year is in accordance with the letter of the Secretary of the Treasury of the 24th May 1866, in which the approval of the Lords of the Treasury was communicated, for the expenditure of a sum not exceeding 195,000 *l.* on new buildings at South Kensington, to be spread over a period of six years. The correspondence on this subject, with a plan of the buildings, was printed by order of the House of Commons, on the 23rd July 1866.

(D.) This Exhibition extends over three seasons, opening in April and closing in August. The Exhibition is held in the Upper Arcades overlooking the Royal Horticultural Gardens, which have been prepared and heated. It is made as self-supporting as possible. This Exhibition is based upon the suggestions made by the Earl of Derby in a letter dated 6th May 1865, from which the following extracts are made:—

“I have long thought that a National Portrait Exhibition, chronologically arranged, might not only possess great historical interest by bringing together portraits of all the most eminent contemporaries of their respective eras, but might also serve to illustrate the progress and condition, at various periods, of British Art. My idea, therefore, would be to admit either portraits of eminent men, though by inferior or unknown artists, or portraits by eminent artists, though of obscure or unknown individuals. I have, of course, no means of knowing, or estimating, the number of such portraits which may exist in the country; but I am persuaded that, exclusive of the large collections in many great houses, there are very many scattered about by ones and twos and threes in private families, the owners of which, though they could not be persuaded to part with them, would willingly spare them for a few months for a public object.”

“The question of one, two, or three exhibitions in consecutive years, would, I apprehend, be mainly decided by the result of future inquiries as to the probable number of pictures which could be obtained, and the space which could be found for their exhibition. But whether the period over which each exhibition (if more than one) should range, be longer or shorter, the point on which I should set the greatest value, in an historical, if not in an artistic point of view, would be the strict maintenance of the chronological series. I shall be very happy if any suggestion of mine should lead the Committee of Council to take up seriously, and carry out, with such alterations of detail as experience might suggest, a scheme which I think could hardly fail of being generally interesting; and I should have much pleasure in placing temporarily at their disposal any portraits from my collection at Knowsley which they might think suitable for their purpose.”

(E.) The object of this Vote is the removal of the iron building at South Kensington to a site at Bethnal Green, which is offered, free of cost, by a committee in the locality.

Note.—Sir R. Murchison computed in 1860 that with the present staff of surveyors the geological survey of England, as regards the publication of maps on the 1-inch scale, would be completed in from 15 to 20 years; of Scotland, in about 32 years; and of Ireland, in about 25 years; but for reasons given in his annual report of last year, he thinks the time will be longer. The large additions which were last year made to the staff, were with a view to the more rapid completion of the work.

The Commissioners have already reported on—

- The River Thames.
- The River Lea.
- The Rivers Aire and Calder.

They have inspected the River Basins of the Lower Avon (Wiltshire and Somersetshire) and Frome (Stroud Valley, Gloucestershire), the seat of the West of England woollen trade, but have deferred holding local inquiries for receiving evidence until they have reported on the Rivers Mersey and Ribble.

They are now engaged making a preliminary inspection of the Basins of the Rivers Mersey and Ribble, preparatory to holding local public inquiries and taking evidence in the principal towns of those watersheds.

These inquiries, relating to extensive pollution by all forms of manufacturing refuse, particularly that arising from the cotton manufacture and processes connected therewith, will occupy the Commissioners the greater part of the next year. They hope, however, to report on the Rivers Mersey and Ribble during the year 1868.

After which, according to the instructions issued to the Commissioners, there will remain to be inquired into—

- The Tributaries of the Thames (except the River Lea).
- The Severn Basin.
- The Taff Valley.
- A River Basin comprising a Mining District in Cornwall.
- The Lower Avon and Frome.

Assuming that these inquiries are to be conducted in the same manner as the Commissioners have previously adopted, their duties will probably continue during the whole of the year 1868-9.

The Commissioners have been chiefly engaged during the past year in the examination of the designs of the competing architects. Should the appointment of an architect be postponed, and the works delayed, the above-mentioned staff will be reduced.

The Expenses connected with the Exhibition of Designs were defrayed from the Funds for building the New Courts of Justice; they amounted to 1,469 *l.* 16 *s.* 3 *d.*, in addition to 8,800 *l.* paid to the eleven competing architects, and 1,457 *l.* 7 *s.* 11 *d.* for expenses of printing reports, photographing plans and elevations, and examining designs.

The Commissioners have delivered their first Report, in which they express their opinion that a Digest of the Law is expedient, and recommend that a portion of the Digest, sufficient in extent to be a fair sample of the whole, should be in the first instance prepared, under their superintendence. Her Majesty's Government have accordingly authorised the Commissioners to employ Draughtsmen in the preparation of Specimens. Three portions of the Law have been selected to constitute the subjects of the Specimen Digests, and the several Inns of Court were requested to issue Notices, stating the conditions prescribed to Barristers desirous of being employed on these duties; applications to be sent in before the 31st January last. The Commissioners are employed in selecting Draughtsmen for this work, which they trust will be completed in the course of 1869.

This Estimate is framed on the assumption that it will not be found necessary to institute further inquiries under the Trades Union Commission Acts. The Sheffield Inquiry cost about 2,247 *l.*, and the Manchester Inquiry 2,230 *l.*, in addition to the Expenses of the Commission, which have amounted, since its commencement in February 1867, to more than 1,200 *l.*, exclusive of shorthand writing. The Commissioners have already presented four Reports of the Evidence that has been taken, but owing to the scope and importance of the inquiry, there is no immediate prospect of its being brought to a conclusion.

The Expenses of this Commission for the past year, which were somewhat erroneously estimated at 10,000 *l*., amounted to about 1,400 *l*. It is impossible to estimate very accurately the expenses of the Commission for the year 1868-9, and the above Estimate has therefore been framed upon examination of last year's Accounts. It is hoped that the Report may be presented in the course of the year, and that the sum of 2,500 *l*. will suffice to defray the current Expenses. The following Scale has been fixed for the remuneration (in addition to actual Travelling Expenses) of persons employed by the Commission:—

Mining Engineers - - - - -	not exceeding £.3 - - per diem.

*Note**—The Out-door Officers are occasionally employed for the convenience of Merchants, and in such cases the Merchants are called upon to pay the expense of the Officers' attendance, which is brought to account as Customs Revenue. The amount received in the year ended 31 March 1867 was 3,176*l.* 11*s.*

Note†—The Out-door Officers and Boatmen are paid 16*l.* a year, in lieu of day pay, after an approved service of five years; and *all* officers of these ranks receive day pay when employed on Sundays.

Note‡—Previous to the passing of the Customs Amendment Act, 1857, the Crown provided Warehouses for the deposit of Tobacco under Bond. The Crown is liable to the payment of Rent for the Warehouse which was provided at Liverpool, until the expiration of the lease thereof; but the Premises have been sub-let from the 25th March 1865, at a rent equal to that paid by the Crown, 6,760*l.*; and this amount will be brought to account as Customs Revenue.

* The Tables for the Insurance of Lives, and that portion of the Tables for the grant of Annuities, which have been framed under the authority of the Act 27 & 28 Vict. c. 43, have been constructed in accordance with the 6th section of that Act, which section declares it to be expedient that the Fund to be formed by the receipt of Sums on Account of Contracts effected under the Act, shall be adequate to meet all claims accruing, and to accrue, thereon so as to render certain the fulfilment of all engagements under such Contracts, without entailing any charge in respect thereof, or in respect of Costs and Expenses, on the Consolidated Fund of the United Kingdom.

To the premiums fixed for the purchase of Annuities payable half yearly, by single or annual payments, no addition has been made for Costs and Charges; but to provide for such Costs and Charges, the purchasers of such Annuities are required to pay, at the time of purchase, Fees not exceeding those sanctioned in respect of such Annuities by the Acts 7 & 8 Vict. c. 83, s. 9, and 16 & 17 Vict. c. 45, s. 11.

The amount expended under this Vote will be repaid to the Exchequer with other extra receipts.

GEORGE WARD HUNT.

EXPLANATIONS.

1. This excess was caused by the necessity of extra temporary clerical assistance.
2. This slight deficiency is attributable to the increase of the staff of the Irish Fishery Commission.
3. This excess was caused by the prevalence of the Yellow Fever in the West Indies.
4. This deficiency is explained in the Estimate for 1868-69. It was due in great part to the large expenditure for Parliamentary Printing in 1866-67.
5. This excess was chiefly caused by the large expenses attending the case of "Ryves v. The Attorney General."
6. This slight excess was the result of increased business. The fees received in 1866 exceeded, by nearly 1,500 £, those of the preceding year.
7. This excess was caused by increased payments on account of Incidental Expenses of the Courts of Session.
8. This deficiency was occasioned by the Proceedings for Repression of the Fenian Agitation.
9. This excess is mainly attributable to a Deficiency in the Bankruptcy Court Fee Funds.
10. This excess occurs on a Vote amounting to 287,000 £, and is occasioned partly by the growth of the system of Reformatory and Industrial Schools, and partly by the increased Cost of maintaining Prisoners in County Gaols.
11. This Vote has lapsed; the present Estimate is required in order to repay to the Treasury Chest the sum due on 31st March 1867.
12. The details of the expenditure which caused this excess will be found under the Estimate for 1867-68. It was chiefly due to the expenses of Mr. Rassam's Mission to Abyssinia, and of investing the Kings of Belgium, Portugal, and Denmark, and the Grand Duke of Hesse, with the Order of the Garter.
13. This Estimate is always very uncertain; an excess of about 6,000 £. was occasioned partly by the great number of seamen relieved, and partly by the increased cost of provisions. An alteration in the mode of rendering the accounts to the Exchequer and Audit Department caused a sum of about 10,000 £. to be charged to the Vote for 1866-7, which would otherwise have been paid from the Supplies of 1867-8.
14. A Vote is no longer required for this service; this sum is for the purpose of repaying to the Civil Contingencies Fund the balance due on 31st March 1867.
15. This deficiency is attributable to unexpected demands for the supply of Badges, Robes, &c., for the Orders of Knighthood.
16. This amount is composed of 1,726 £. expended in repairs necessary to fit some of the Vessels for sale; and 118 £. 9s. 4d. expended by the Indian Government and the Admiralty on account of the sale at Bombay.

SUPPLEMENTARY ESTIMATE.

AN ESTIMATE of the SUMS required to be Voted for the Expenditure of the Year ending 31 March 1868 in addition to the SUMS provided in the ESTIMATES presented in the Session of 1867.

One Hundred and Thirty-four Thousand Pounds.

To be apportioned as follows:—

LANDGUARD POINT WORKS.

FOR Works at Landguard Point, near Harwich Harbour, under the Act
26 & 27 Vict. c. 71.

CLASS I.
Vote No. 40.

Two Thousand Pounds.

The sum of 10,000 £. was voted for this service in 1866-7, of which only 2,000 £. was expended.
This Vote is for the purpose of repaying advances from the Civil Contingencies Fund.

INSPECTORS OF FACTORIES, &c.

CLASS II.
Vote No. 17.

Five Thousand Pounds.

THIS amount is required to meet the increased Expenditure caused by the appointment of additional Factory Inspectors to carry out the provisions of the Act 30 & 31 Vict. c. 103; and also to pay the Salaries and Expenses of the Inspectors of Lime Juice, appointed under 30 & 31 Vict. c. 124. Advances have been made from the Civil Contingencies Fund.

CLASS II.
Vote No. 33.

QUARANTINE EXPENSES.

Four Thousand Pounds.

IN consequence of the prevalence of Yellow Fever in the West Indies, it has been found necessary to hire the "Parana" from the Royal Mail Steam Packet Company, as a receiving ship. The above sum is to meet the payments made to the Company, and the expenses of Medical Attendance. The necessary Advances have been made from the Civil Contingencies Fund.

CLASS III.
Vote No. 1.

LAW CHARGES, ENGLAND.

Eleven Thousand Pounds.

THE expenditure from the Vote for Law Charges, England, 1867-8, has exceeded the Estimate, in consequence of the Special Commission appointed for the trial of the Fenian Prisoners at Manchester, of Fenian Prosecutions generally, and of large and exceptional payments for assistance in preparing Bills. Advances have been made from the Civil Contingencies Fund.

CLASS III.
Vote No. 18.

LAW CHARGES, IRELAND.

Thirty-six Thousand Pounds.

THE deficiency on this Vote is caused by the disturbed state of the Country. Advances have been made from the Civil Contingencies Fund.

CLASS III.
Vote No. 19.

COURT OF CHANCERY, IRELAND.

SALARIES AND EXPENSES.

Fourteen Thousand Pounds.

THE Salaries and Expenses of the Court of Chancery, Ireland, were, with the exception of those provided for in the Estimate for that Service, paid out of the Suitors' Fee Fund, or from fees received by Officers for their own benefit. The Act 30 & 31 Vict. c. 129, directing them to be paid out of moneys voted by Parliament, came into operation on 1st October 1867, and this Vote is for the purpose of repaying Advances from the Civil Contingencies Fund. All fees are now taken in stamps.

CLASS III.
Vote No. 36.

MAINTENANCE OF PRISONERS.

Twelve Thousand Pounds.

THIS Vote is for the purpose of meeting the expenditure caused by the increase in Reformatory and Industrial Schools, and by the augmented cost of maintaining Prisoners in County Gaols.

 TEMPORARY COMMISSIONS.

 CLASS VII.
 Vote No. 1.

 Twenty-one Thousand Pounds.

THIS Vote is required for the purpose of paying the expenses of the Boundary Commission, of the inquiries connected with the Trades' Unions Commission, and of certain other Commissions appointed during the past year, whose aggregate expenditure has exceeded the amount provided in the Vote taken in the Session of 1867.

 LOCAL DUES ON SHIPPING UNDER TREATIES OF RECIPROCITY.

 CLASS VII.
 Vote No. 4.

 Eleven Thousand Pounds.

THIS Vote is required in consequence of annual payments to a considerable amount having been commuted by a final payment. The Estimate for 1868-9 will show a reduction.

 AGRICULTURAL STATISTICS.

 CLASS VII.
 Vote No. 10.

 Eight Thousand Pounds.

THE Estimate for this Service is necessarily very uncertain, and the Vote taken in 1867 proved insufficient; but out of the above sum more than 4,000 £. will be repaid to the Post Office, as the cost of stamps impressed upon schedules for free transmission to and from the occupiers of land.

 CAPE HAYTIEN BOMBARDMENT—COMPENSATION.

 CLASS VII.
 Vote No. 13.

 Four Thousand Pounds.

THIS Sum is required to repay to the Civil Contingencies Fund the payments made for compensation to foreign merchants and other sufferers by the Bombardment of Cape Haytien by H. M. S. "Bull Dog."

 SHANNON RIVER SURVEY.

 CLASS VII.
 Vote No. 14.

 Six Thousand Pounds.

THIS Amount is required for the purpose of repaying to the Civil Contingencies Fund the sums advanced to meet the expenses of making a Survey of the River Shannon after the late inundations, and designing works to protect adjacent lands from future injury.
